Description/Remarks

This is a 2-story single-family residence in the Prairie style built in 1904. The building is rectangular in plan. The structural system is frame. Exterior walls are stucco. The building has a hip roof clad in asphalt shingles with deep and one hip-roofed dormer. The eaves angle down from the house with no visible horizontal soffit. There is one side right, exterior, brick chimney and one offset left, rear slope, brick chimney. Windows are , 1-light casements. Three casement windows and two narrow, 1/1 sash windows feature prominently across the second floor of the front façade. The casements, in particular the tripartite casement and the bay with no central window, appear to be characteristic of the builder and are found on several other similar buildings on the same block. There is a single-story, full-span partially enclosed characterized by a hip roof clad in asphalt shingles with rectangular stuccoed posts. The full-width front porch is enclosed on the right half and open on the left. The front entry is located within the open half of the front porch.
